

AviSoft– PROPERTY AND TENANT MANAGEMENT

At x-Spatial, we understand the business value of your data and the business processes you need to support.

We have worked with airport operators and owners to develop software solutions for large, complex infrastructures.

Our solutions build on open standards and open database access to make sure they work easily with any systems you already have in place.

A comprehensive, browser based, geographic information systems (GIS) enabled purpose built application for managing airport properties and tenants. AviSoft manages and maintains all tenant related agreements and billing information.

Features

- Direct access to your property and tenant information
- Provides the ability to create complex rules based billings for all tenants including concessionaires
- Integrates all data types
- Enforces enterprise data standards during data creation and updates
- Full interoperability with your financial and accounting systems
- Generates invoice line items for upload to your accounting / financial system
- All in one solution for both tenants and sub-tenant

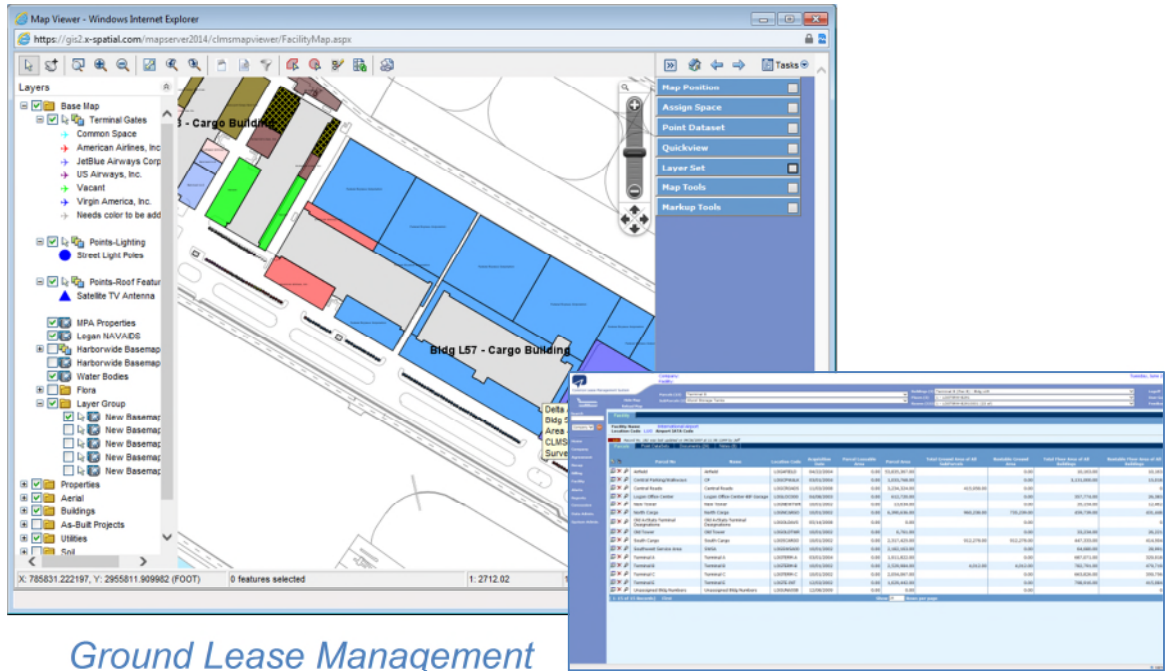

Benefits

- Seamless use of your latest architectural and space drawings
- Easily configured for all your needs
- Guaranteed data integrity
- Straightforward administration
- Increased productivity
- Agreement Status, Alerts, and reports at your fingertips
- Effectively manage your concessionaires & their billing submittals
